

Employing a person with a disability is just good business

At DSA Employment Solutions we understand how important it is to find the right people for your workplace.

We offer a free service that assists employers to find the right person for the right job.

We do this by assisting people with a disability (who have the skills to work) to gain and maintain employment. We also provide assistance to people already in the workforce who may need support.

We offer you a simple and cost free solution to your recruitment needs.

For employers, Disability Employment Services can provide a range of **free services**, including help to employ and retain workers with disability.

We can assist you to access a range of financial incentives and support including financial assistance that can be used to purchase work related modifications if required

DSA Employment Solutions is funded by the Australian Government, which means no cost to either the employer or the employee.

Utilising the expertise of the DSA Employment Solutions team you save on advertising and recruitment agency charges – and we arrange on the job training and post job placement support for your successful candidate.

We can also provide information about, and assistance with any additional training and traineeships, apprenticeships and wage subsidies that may be available.

Our Employment Consultants are committed to matching the right employees to the right role and can work with you to identify suitable positions for our jobseekers.

Research shows that people with a disability have lower absenteeism & higher retention rates and are involved in fewer WHS incidents than other members of the workforce.

We can work with you to identify existing roles that could be tailored to suit a person with a disability and can offer disability awareness training for your existing staff.

We are experienced in placing people into work across a broad range of industries including retail, hospitality, horticulture, construction, manufacturing, clerical and office administration, information technology and more.
